Hill's Standard Transplanted Evergreens

Good Hill quality Evergreens do not just happen. We put the Hill Quality into them deliberately in numerous ways. First—Our soil and climate is ideal for Evergreen culture. Second—We develop the strength and vitality of our stock (so necessary for successful removal and shipment)—by actually root-pruning and transplanting at definite intervals. Third—By our system of digging, handling and packing whereby Hill's Evergreens can travel the longest distance with safety. Hill's Evergreens are always freshly dug, generously graded and carefully packed. You get no culls, as they are consigned to the brush pile.

Hill's Specimen Evergreens and Conifers

B & B — Balled and Burlapped

These trees are all perfect specimens, having good roots owing to frequent transplanting. Always freshly and carefully dug. No extra charge for Ball and Burlap. To satisfy the increasing demand, a large acreage in our Nursery is devoted to the growing of Specimen Evergreens to be handled with Ball and Burlap. This stock is all grown in wide rows with plenty of room to develop both root and top. Each tree is staked to insure symmetrical growth and at regular intervals throughout the growing season trimming and pruning is done by men of long experience in this line. We keep this stock on the move also, transplanting every two years, as a root system can be developed in no other way, and in Evergreens, roots are the basis of success.
